1.1. Digital Shareholder Meeting Overview

BetaNXT's MIC Digital Shareholder Meeting (DSM) enables shareholders to participate in an annual meeting, vote and ask questions – all online. Shareholders can access DSM via their computer, tablet or mobile device. Issuers' or funds' registered owners, beneficial shareholders and approved guests can join the meeting.

BetaNXT authenticates registered and beneficial owners, enabling them to vote and, if enabled, ask questions.

Issuers and funds can host virtual-only or hybrid (in-person and virtual) meetings. They can incorporate audio and stream live video and PowerPoint presentations.

BetaNXT is the “producer” of the meeting. In this role, we upload the presenter's presentation as well as start and end the meeting. DSM is a turnkey solution covering all aspects of the Digital/Virtual Proxy meetings: Meeting set up, technical support and shareholder interaction – questions and/or voting.

1.2. Shareholder Experience

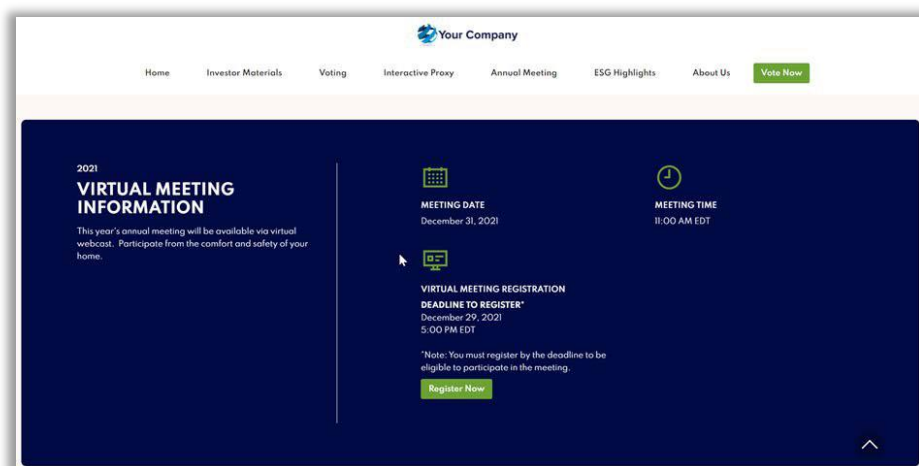

What They Can Do

- Register for DSM and in-person meetings, in the case of a hybrid solution.
- Listen to and view the meeting presentation.
- Ask questions prior to and during meeting (at host's discretion)
- Vote before or during the meeting
- View meetings archived on host website.

How They Do It

Registration

1. Go to document hosting site of the issuer or fund. The URL can be found in your proxy statement.

2. Enter your control number, included in your proxy card/voter information form.

A screenshot of the registration page on the 'Your Company' website. It features a white background with the company logo at the top left. The main heading is 'Please enter your 12 or 16 digit control number.' Below this, a note states: 'Access to the meeting is limited to shareholders, and guests are not allowed into this meeting.' There is a text input field labeled 'Control Number' and a blue 'Log In' button. At the bottom, there is a link: 'What's in my control number? (Helping trouble registering?)'.

3. Complete registration page, including any question you want to ask the board, and submit.

Note: Registered and beneficial owners have different registration pages.

☒ By checking this box, I affirm to the following: I am a shareholder of Your Company, Inc. as of record date April 9, 2021 and therefore entitled to attend the virtual meeting. I am aware that falsification of this affirmation may give rise to civil and/or criminal liability under applicable United States Federal and state laws. I also acknowledge that any information I provide as part of this registration will be shared with the issuer for the sole purpose of gaining access to this meeting.

4. You'll receive an email confirming your registration.

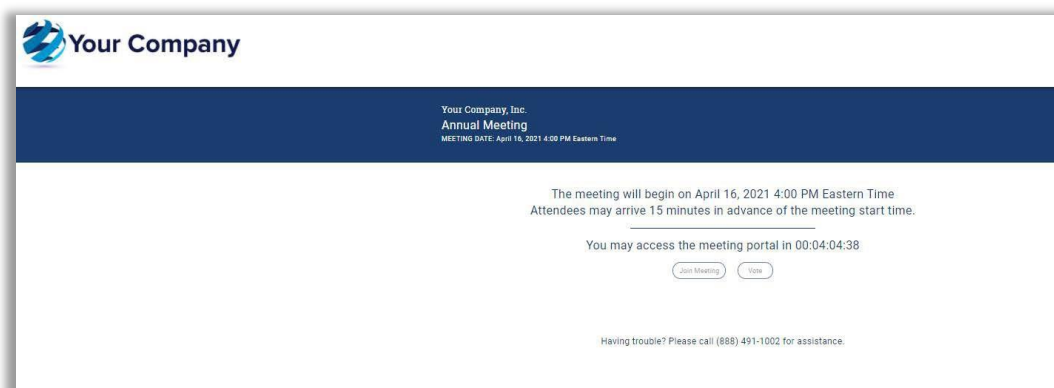

Joining and Viewing the Meeting

5. Shareholders who register in advance of the meeting start time will receive an email one hour before. Shareholders registering near meeting start time will receive confirm email and be taken directly to the meeting portal.

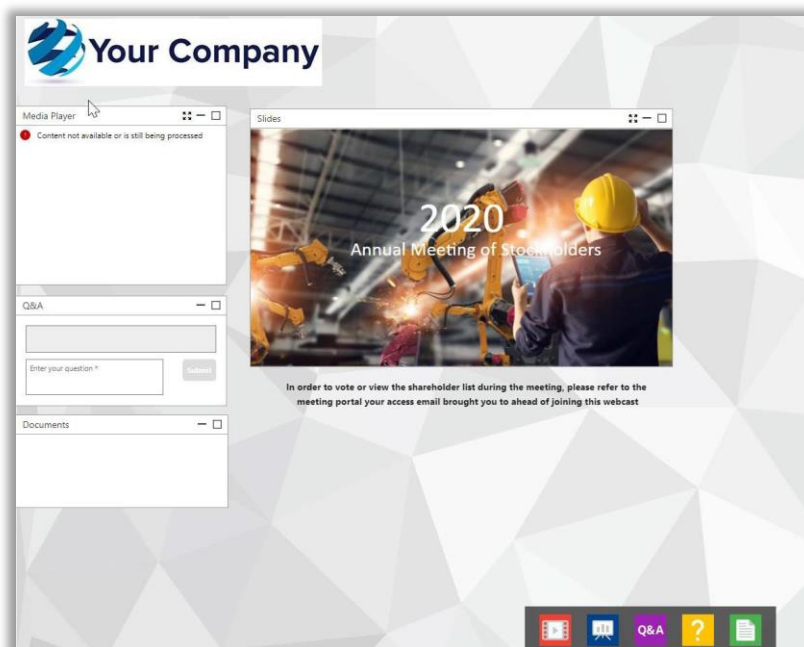

- 15 minutes prior to the meeting start time, the user can click the “Join Meeting” button.

- Once the meeting starts, you'll be able to hear the speakers, view presentations, watch videos and ask questions via text.

Voting

How you access your ballot depends on whether you vote before or during the meeting

Before

8. After registering, you'll be taken to a confirmation page with a “go to ballot” button.

The screenshot shows a web page for 'Your Company' with a dark blue header. Below the header, a dark blue bar contains the text 'Thank You' on the left and 'REGISTRATION COMPLETE' on the right. The main content area is white and contains the following text: 'You have successfully registered for the Virtual Annual Meeting. To vote your ballot click the button below.' Below this, a line of text states: 'A confirmation email has been sent to the address below.' There are four input fields: 'First Name' (with 'Text' as a placeholder), 'Last Name' (with 'Account' as a placeholder), 'Email' (with 'dmhsupport@mediantonline.com' as a placeholder), and 'Questions for Management' (with 'Text Question' as a placeholder). At the bottom, there are three buttons: 'Go to Ballot' (dark blue), 'Log Out' (dark blue with a user icon), and 'Go to Registration' (light blue).

During

9. Return to the portal page and click on the “Vote” button to access the ballot.

The screenshot shows a web page for 'Your Company' with a dark blue header. Below the header, a dark blue bar contains the text 'Your Company, Inc. Annual Meeting' and 'MEETING DATE: April 16, 2021 4:00 PM Eastern Time'. The main content area is white and contains the following text: 'The meeting will begin on April 16, 2021 4:00 PM Eastern Time. Attendees may arrive 15 minutes in advance of the meeting start time.' Below this, a line of text states: 'You may access the meeting portal in 00:04:04:38'. There are two buttons: 'Join Meeting' (light blue) and 'Vote' (light blue). A green arrow points to the 'Vote' button. At the bottom, there is a line of text: 'Having trouble? Please call (888) 491-1002 for assistance.'

10. Vote your ballot and then click on the Confirm Vote button.

Presenter Experience

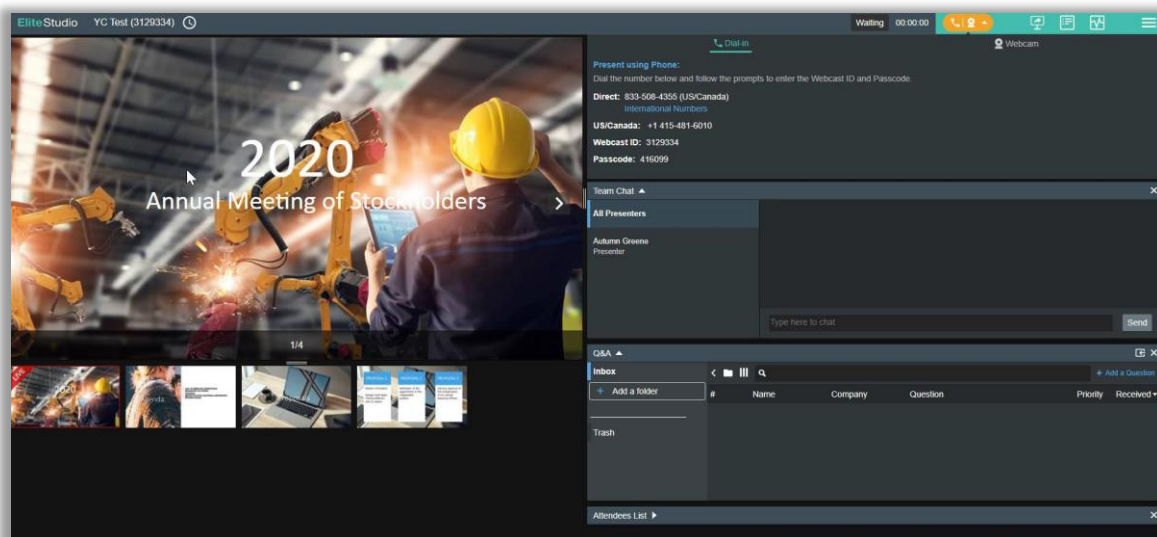

What They Can Do

- Speak to shareholders as a group. No more than 10 speakers are allowed during a meeting, including your BetaNXT producer and Inspector (if applicable).
- Concurrently share PowerPoint presentations and videos with shareholders.
- Instant message/chat with other presenters during the meeting.
- Group, prioritize and respond to questions from shareholders.
- Post a recording of the meeting to your issuer or fund website.

How They Do It

Before the Meeting

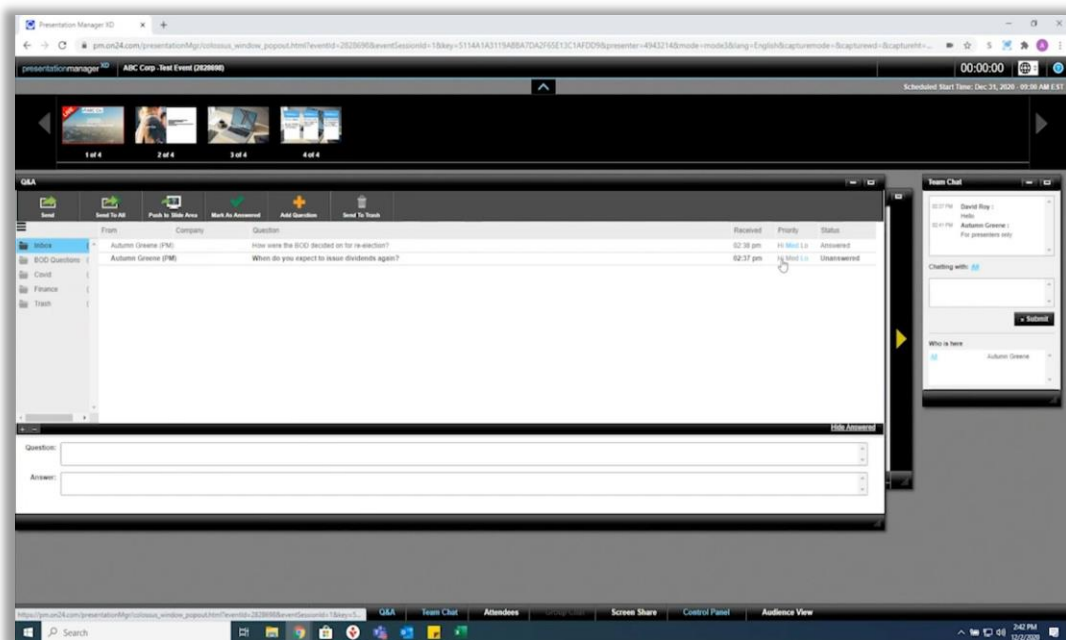

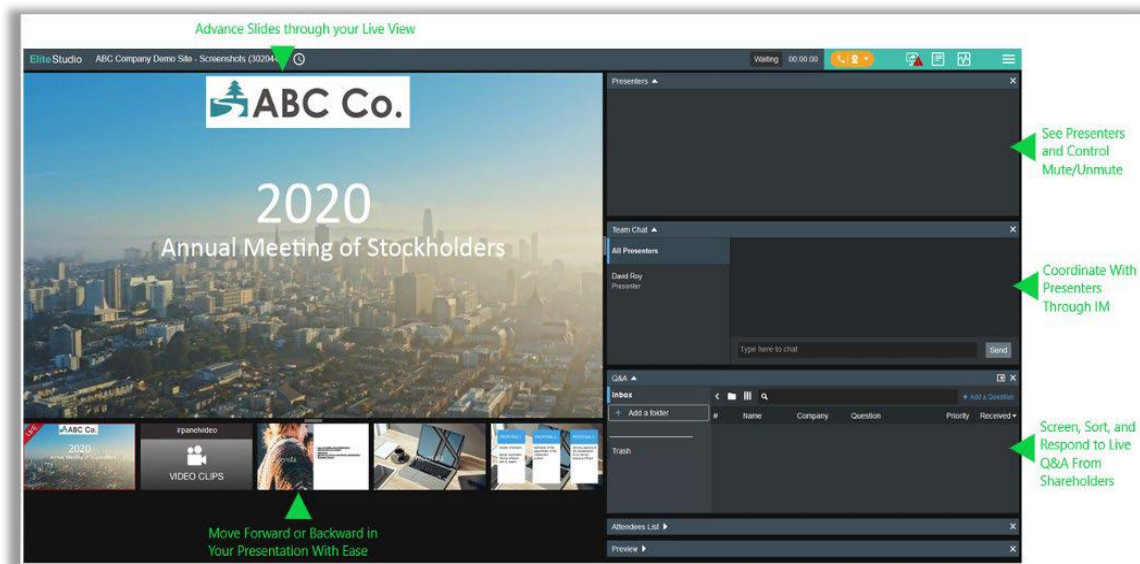

1. Each presenter will receive a calendar invite from BetaNXT with a presenter link for the meeting. This will include the meeting URL and dial-in information.
2. Add meeting to your calendar to ensure you do not book another meeting during this time.
3. Conduct a rehearsal with all presenters and BetaNXT ahead of the meeting. Presenters should become familiar with the DSM Presentation Manager Console and how to advance slides, use the chat feature and manage Q&A.

4. Send your presentations and videos to BetaNXT 48 hours prior to the start of the meeting to be uploaded to the DSM platform. They will appear in the Presentation Manager Console which can be checked for accuracy ahead of the meeting.
5. All presenters should login to the meeting 15 minutes before it starts. We also recommend you use a hard wire connection to the Internet.

During the Meeting

6. BetaNXT will start the meeting at the designated time. A clock counting down the final five seconds to going live will be visible to presenters. This countdown is also spoken by the producer to allow for a verbal prompt.
7. Once the meeting begins, presenters can speak to shareholders, present slides, IM other presenters and preview questions.
 - a. Group questions by topic to prioritize and view the status of questions and ensure the correct management team member responds. We also identify the individual asking question.
8. BetaNXT ends the meeting.

1.3. DSM FAQ

1. Can an issuer host either a “virtual only” or a hybrid meeting?

Yes, BetaNXT supports hybrid meetings (virtual and in-person) as well as virtual-only meetings.

2. Who can attend a DSM?

Registered owners, beneficial owners, and guests. Firms must provide BetaNXT with a list of approved guests, and their emails, for them to attend.

3. What are the technology requirements for presenters?

Operating system and Browser

- Windows 7+ running the latest version of Chrome, Firefox or Edge
- Window 10 running Internet Explorer
- MAC OS 10.10+ running the latest version of Chrome or Firefox

Browsers must be configured to accept cookies and have JavaScript enabled.

Presenters should connect to the Internet via a hard wire cable, *not* Wi-Fi, if possible.

4. How can shareholders access a DSM?

DSM is a webcast that shareholders can view on their browser, no plug-ins or downloads required. Shareholders can access a DSM via their computer, tablet, or mobile device.

5. When is the registration cut-off for attendees?

Registration cutoff is not needed but can be used at the client's discretion.

6. Can shareholders revoke their registration?

Yes, should shareholders elect to attend the meeting in person, or are unable to join a DSM, they can revoke their registration on the registration page or via the link in their registration confirmation email.

7. Can presenters also register as attendees?

No, presenters should not also register as attendees.

8. How many presenters can an issuer or fund have?

An issuer or fund can have 10 different presenters during a DSM. However, minimizing the number of speakers will improve audio quality and the continuity of your event.

9. How many shareholders can participate in a DSM?

One thousand shareholders can participate in a DSM. If you have more than that, please speak with your BetaNXT representative and we will accommodate you.

10. What materials can a presenter use during a DSM?

PowerPoint presentations, PDF documents and videos. Google slides are not supported.

11. What are the file requirements for material presented during a DSM?

PowerPoint

- PPT and PPTX file formats
- Maximum file size: 50MB
- Maximum number of slide decks: 10
- Presentation in 4:3 and 16:9 aspect ratios
- Limited animation supported and only for text
- Not supported: GIFs and embedded SmartArt, audio, Excel files, videos and custom bullets

PDF

- Not supported: Media, iFrame, embedded and object tags

Video

- MP4 format

12. When can shareholders ask the board questions?

Before and during the meeting.

13. Does the board have to allow questions?

No. However, they can limit question submission to solely before the meeting.

14. How can presenters review questions submitted prior to the meeting?

Any questions submitted during the registration process are available real time utilizing the Meeting Attendance Report available to Issuers through our secure platform MIC.

15. Can presenters identify who is asking the question during the DSM?

Yes, this helps presenters ensure they do not overlook questions from key stakeholders. Additionally, BetaNXT provides a post-meeting report of shareholders that attended the meeting and the questions they asked.

16. Will there be a viewable list of stockholders of record entitled to vote during a DSM, as required by some States?

Yes, a link to a list of registered shareholders of record will be securely hosted on the portal shareholders use to access the event. The link to the shareholder list will only be available during the meeting and is only accessible by shareholders. Shareholders must enter their access number to view the shareholder list.

17. Can shareholders speak during the meeting?

DSM is a webcast—no dial-in phone lines are available for shareholders and therefore, they cannot speak during a DSM. If an issuer or fund wants to enable shareholders to speak during a DSM, please contact your BetaNXT representative and they will accommodate you.

18. Can a shareholder make a proposal during a DSM?

Yes. Please contact your BetaNXT representative about enabling shareholders to make proposals.

19. When can shareholders vote on proposals?

Shareholders can vote before or during the meeting.

20. Will BetaNXT serve as master tabulator for the meeting?

Yes. BetaNXT will tabulate all votes made via DSM and in-person. Tabulation is done in real-time.

21. Does BetaNXT provide reports on a DSM?

Yes, BetaNXT provides standard reports, please contact your BetaNXT representative about your reporting options.

22. Does BetaNXT provide technical support for the meeting?

Yes, BetaNXT provides technical support during, but not prior to, a virtual meeting. DSM is a turnkey solution that does not require any plug-ins or downloads. Therefore, you can host a DSM without the assistance of your IT or development teams.

An email address for support is provided during the registration process and a toll-free support number is provided in the email that registrants receive one hour prior to the meeting.

23. How does BetaNXT's DSM solution protect issuers and shareholders from security threats?

BetaNXT protects a shareholder's personally identifiable information (PII) by encrypting all data at rest and in-transit using AES 256-bit encryption. A client's PII never leaves the BetaNXT platform. We protect all data and our solutions from cyber and physical threats by hosting them in ISO 27001-compliant data centers, which conduct 24x7 security monitoring, intrusion detection and threat analysis. BetaNXT's SaaS platform runs in a highly redundant, multi-regional environment that enables us to easily scale capacity to meet demand.

24. What can a digital legal proxy do that basic validation can't?

A digital legal proxy is much more than a basic validation check. It helps tabulators accurately tally the vote by informing them of the number of shares a beneficial owner has and whether they voted. A digital legal proxy also enables the beneficial owner to vote on the tabulator's platform instead of leaving the meeting to vote on their proxy provider's platform.
